

MEDIA GATEWAY

THE LARGEST MEDIAHUB IN THE NORDICS

Cibicom's Media Gateway provides the ability to easily connect and deliver TV and radio channels in one of Northern Europe's largest Mediahubs. The product is aimed at those who want to have physical access to a wide range of programme channels for redistribution in your programme platforms.

With Media Gateway you can ensure the quality of the transmission between distribution and contribution. The connection takes place in a safe place with high quality and in the desired format.

Cibicom's nationwide fibre network

Availability:
Monitoring by our 24-hour manned
NOC, 24/7/365

CONNECTION TO MEDIA GATEWAY

You can download the TV/radio channels via our many access points which are spread all over Denmark. Redundancy and security can be adjusted to provide optimal accessibility for each TV/radio channel. Depending on the respective channel, the delivery can be made via satellite or fibre to or from the access points. We are happy to help transport the signal to our Mediahub, and we can also offer encoding or transcoding of the channels. It is also possible to supply the channels mixed in a transport stream [MPTS].

Cibicom's Media Gateway

Our Media Gateway is a natural hub where players in the media business can meet and exchange material in different formats. It is simple, flexible and is always high quality.

Conditions

You enter into an agreement with the copyright owner, and then we can provide the channels.

Other products

In addition to the Media Gateway, we offer Media Transport in an international media network with POI connections [Point Of Interconnect] in Stockholm, Oslo, Copenhagen and Helsinki. We also offer TV and radio broadcasting, teleport services, connection solutions, placements and monitoring by our own 24-hour.

WE OFFER:

- Easy and secure access to the TV/radio channels to which you hold the distribution rights.
- One of the market's largest range of TV/radio channels, some of which are offered exclusively by Cibicom A/S.
- Easy access to TV/radio channels via our many access points.
- Flexible delivery of TV/radio channels as desired, e.g. transcoding between formats, IP redirection, mezzanine format and encoding in MPEG2, MPEG4/AVC or HEVC/H.265.
- Safe and secure delivery of TV/radio channels for redistribution on your platforms.
- A stable supplier with long experience in audio and visual handling and with a focus on quality and robustness.
